

ACTIVITY

Where in the World is Geothermal Energy?

The chart below lists the 24 countries where geothermal energy is produced. Find five countries on the map on the next page, outline them, and write in their names. (Use a globe or another geography resource to locate each country on the map.) Create a symbol for geothermal energy and use it to label the five countries you have chosen. This will give you an idea of where some of the geothermal "hot spots" are situated around the planet.

Countries Generating Geothermal Power in Megawatts (MW)

Country	Installed Capacity (MW)
United States	3,086
Philippines	1,904
Indonesia	1,197
Mexico	958
Italy	843
New Zealand	628
Iceland	575
Japan	536
El Salvador	204
Kenya	167
Costa Rica	166
Nicaragua	88
Russia	82
Turkey	82
Papua New Guinea	56
Guatemala	52
Portugal	29
China	24
France	16
Ethiopia	7.3
Germany	6.6
Austria	1.4
Australia	1.1
Thailand	.03
